ABOUT ME

Self-taught MERN stack developer with experience in MongoDB, Express.js, React.js, and Node.js. Passionate about problem-solving and delivering client-focused solutions through continuous learning and practical experience in freelancing and internships.

EXPERIENCE

Outlier
Sept 2024 - present

Contributed to AI training projects by evaluating model outputs, improving and debugging code, reviewing peer contributions, and developing original frontend solutions based on prompts.

Uneeq Interns
Jan 2025 - Feb 2025

Top-performing web development intern at Uneeq Interns; built an authentication system with Express.js, integrated PayPal into a donation site, and developed a responsive e-commerce platform with a full payment gateway.

Freelance
Nov 2024 - Dec 2024

Successfully developed a Telegram bot using Node.js and the Telegram API to create an educational tool that helps students study more effectively and access materials easily and engagingly. I deployed and hosted the application on Render, and the client was highly satisfied with the results

FEATURED PROJECTS

MEats – Food Ordering Platform (MERN, Shadcn, Auth0): Built a scalable platform with restaurant creation, filtering, real-time order tracking, and secure Auth0-based authentication for users and admins.

Sheet To Chart– A fullstack MERN app that allows users to upload key-value Excel sheets and transform them into stunning charts with ease. Not only can users store their files in a secure database for future use, but they can also export the visualizations as PDFs, add notes to each project, and even download their work later.

EDUCATION

Faculty of Computers and Artificial Intelligence – Beni Suef University (2023 - 2027)
