ABOUT ME

Self-taught MERN stack developer with experience in MongoDB, Express.js, React.js, and Node.js. Passionate about problem-solving and delivering client-focused solutions with 3+ years of hands-on experience delivering full-stack solutions

WORK EXPERIENCE

MERN Stack Developer | Thiraa

October 2025– Present

- CRM Maintenance & Optimization: Maintain and scale the company's internal CRM, fixing critical bugs and introducing new features to streamline real-time real estate operations.
- Corporate Web Development: Developed and deployed the official company website for project listings and rental management, enhancing brand identity and user lead generation.
- Design-to-Code Implementation: Collaborate closely with UI/UX designers to transform complex Figma designs into responsive, high-performance frontend code.
- AI & Data Analytics: Integrate AI APIs to analyze company spending and advertising data, providing automated insights into impressions and marketing ROI.
- Data Visualization: Build interactive dashboards using advanced charting libraries to visualize key statistics and business performance metrics.
- SaaS Feature Engineering: Developed a custom "Brochure Builder" SaaS tool, allowing the team to generate professional marketing materials dynamically from property data.

Full Stack Developer | Freelance

- Fabric E-commerce Platform: Developed a full-stack e-commerce solution for a fabric business, featuring a dynamic product catalog, secure checkout, and a custom admin panel for inventory management.
- Web App & Dashboard Improvements: Fixed bugs, optimized responsiveness, and enhanced features for financial business dashboards, including advanced API optimization and database performance to prevent duplicate data storage issues.
- Telegram Bots for User Engagement: Developed and deployed multiple bots using JavaScript, including a financial analysis tool with real-time price notifications and an educational bot for student study materials.
- Cloud Deployment & Hosting: Managed the end-to-end deployment of client applications on platforms like Render, Digital Ocean & Hostinger, ensuring high availability and effective solutions tailored to client needs.
- Property Management Platform: Improved mobile responsiveness and added automated finance tracking features for a property management platform, helping landlords manage compliance and properties efficiently.
- Currency Exchange Rates Dashboard: Created a backend API for managing currency sell rates and built an integrated dashboard using Supabase for real-time monitoring for a fintech client.

AI Trainer | Outlier

Contributed to AI training projects by evaluating model outputs, improving and debugging code, reviewing peer contributions, and developing original frontend solutions based on prompts.

EDUCATION

Faculty of Computers and Artificial Intelligence - Beni Suef University 2023 – 2027

TECHNICAL SKILLS

Languages

HTML, CSS, JavaScript, TypeScript, SQL

Development Concepts

RESTful API Development, MVC Architecture, Responsive and Accessible Design, Database Schema Design, Asynchronous Programming, WebSocket Communication, Version Control (Git)

Technologies & Frameworks

React, Next.js, Node.js, Express, MongoDB, Mongoose, Tailwind CSS, Socket.IO

DevOps

Docker

AI Tooling& Prompt Engineering

Advanced proficiency in tools like Claude Code to streamline full-stack development. Skilled in crafting precise, constraint-based prompts that prioritize clean code, UX, system architecture and technical accuracy.

LANGUAGES

English Upper Intermediate (B2)	Arabic Native	German A2 level
---	-------------------------	---------------------------

AWARDS/ CERTIFICATION

Front-End Development - Meta | Coursera

Node.js, Express, MongoDB: The Complete Bootcamp | Udemy

Top Web developer Intern | Uneeq Interns

FEATURED PROJECTS

Tasks Master

Developed and deployed a full-stack task and note management application using the MERN stack (MongoDB, Express.js, React.js, Node.js). Integrated Hugging Face APIs to power intelligent task suggestions and automatic subtask generation, enabling an AI-driven assistant to help users organize, prioritize, and break down complex workflows. Implemented smart categorization and real-time updates for seamless productivity management. The application was fully containerized with Docker for consistency across environments, with the backend deployed on Render and the frontend hosted on Vercel, ensuring scalability, responsiveness, and reliable performance in production.

Sheet To Chart - Fullstack MERN App

Developed a user-friendly and responsive platform allowing users to upload key-value Excel sheets and convert them into interactive charts. Utilized Ant Design for UI components, Tailwind CSS for layout, and plain CSS for custom styling to ensure a seamless and responsive design. Users can store their files securely, export visualizations as PDFs, add notes to projects, and download their work later.
